If creationism is dead, what do religious people think they mean when they say we believe in God, as Creator or Source in a universe that makes itself? What caused the Big Bang and the Big Birth? How could God be involved, let alone embedded, in natural processes of cosmological and evolutionary change, if any notion of divine intervention undermines the vital autonomy of these processes? It also asks - if the world makes itself what are the physical, political and personal dilemmas of autonomy and freedom? Love s Energy explores particular pattern paradoxes of certainty and uncertainty, ontology and epistemology, order and chance in the indeterminacy present in the fascinating story of science and theology. It provides the general and more specialist reader with an opportunity to make new connections between these formative parts of our intellectual map making and assumptions about the world. In an age when religious dogmatism is intolerant and dangerous, it offers an exciting new alternative for...
