## A Course in Mathematics, for Students of Engineering and Applied Science Volume N . 1

By Frederick Shenstone Woods

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 72 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: . . . suggests a method of finding the tangent to any curve represented by an equation of the second degree, the slope of the tangent being given. For if  $m$  of the required tangent is known, its equation may be written  $y = mx + b$ , where  $b$  is not known. According to the definition of a tangent, however,  $b$  must have such value that the points of intersection of straight line and curve shall be coincident. This condition enables us to determine  $b$ , as shown in the following examples. Ex. 1. Find the equation of the tangent to the parabola  $y^2 = 4ax$ , the slope of the tangent being 2. Since the slope of the tangent is 2, its equation may be written  $y = 2x + b$ . Substituting this value of  $y$  in the equation of the parabola, we have the equation  $3x^2 - 4x - 26 = 0$ . Since the...

### Reviews

*Undoubtedly, this is actually the best operate by any publisher. It is among the most amazing pdf i have got read. Its been printed in an exceptionally straightforward way which is just after i finished reading this book in which actually altered me, change the way i believe.*

-- **Deonte Kohler PhD**

*The ebook is fantastic and great. I really could comprehended every thing out of this published e publication. You can expect to like the way the blogger write this publication.*

-- **Precious Farrell**
