Scientific investigations with reference to aquatic life have always received liberal support and encouragement in the United States, alike from National, State, and private organizations, and individuals of wealth. With its long stretches of sea-coast, facing the two great oceans, and extending from near the tropics far beyond the Arctic Circle, and with its many large river systems and innumerable inland lakes, some more deserving of the name of inland seas, this country possesses within its own domains abundant materials for the study of nearly every class of aquatic phenomena, and of nearly all the more important groups of aquatic animals and plants. Since early times these subjects have furnished interesting problems of research to American students of natural history, who, proportionately with the unparalleled growth of the country, have rapidly increased in numbers, and now constitute a large working force....
