

## A students manual of a laboratory course in physical measurements

Filesize: 8.89 MB

### ***Reviews***

*It is straightforward in read through better to recognize. I could possibly comprehended every little thing using this published e pdf. Its been written in an extremely basic way and is particularly merely following i finished reading through this ebook through which really transformed me, alter the way i believe.*

## A STUDENTS MANUAL OF A LABORATORY COURSE IN PHYSICAL MEASUREMENTS

To read **A students manual of a laboratory course in physical measurements** eBook, you should access the link under and download the document or have accessibility to other information which might be in conjunction with **A STUDENTS MANUAL OF A LABORATORY COURSE IN PHYSICAL MEASUREMENTS** ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: . . . can be found at which the light is least refracted. Clamp the support of the prism. Set the cross hairs on the image of the slit and read the position of the telescope. Remove the prism and set the telescope upon the image of the slit seen directly. The angle through which the telescope has been turned is the angle of deviation of the light, in this case the angle of minimum deviation  $D$ . In the position of minimum deviation the light passes through the prism in a direction such that it makes equal angles with the surface of the glass in entering and in leaving,  $i$  and  $r$ . Consider the small triangle formed by the three paths of the ray extended. From the property of the exterior angle of a triangle,  $D = i - r$ . From the property of similar triangles each half of  $A$  is equal to  $r$ . The value of  $A$  may be taken from the previous experiments. Measure the index of refraction of the glass for the yellow light of sodium and the red light of lithium, using in each case different parts of the divided circle. 14. WAVE LENGTH OF LIGHT BY NEWTONS RINGS The wave length of light was first measured by Newton, who did not recognize, however, that the distances measured were wave lengths, but, having propounded the Corpuscular Theory of Light, maintained that the distances were the lengths of fits of easy reflection...
