Reviews

It is simple in go through preferable to comprehend. It is full of wisdom and knowledge It is extremely difficult to leave it before concluding, once you begin to read the book.

(Leif Predovic)

THE ECONOMICS OF FISHERIES MANAGEMENT: REVISED AND ENLARGED EDITION

Blackburn Press. Paperback. Book Condition: New. Paperback. 298 pages. Dimensions: 8.7in. x 6.0in. x 0.9in. In 1977, Lee Anderson published the first edition of *The Economics of Fisheries Management*. This second edition was first published in 1986. The first edition was remarkably successful in that it remained unchallenged as the most important reference work in the realm of fisheries management, at least from an economic perspective. The second edition underwent considerable revision and enlargement. The book provides a very readable introduction to the economics of fisheries management, beginning with basic microeconomic principles, and then applying those principles to a very wide array of fisheries problems, pushing back frontiers in some advanced areas, while relying on the published literature in others. The discussion begins with an analysis of the basic open access problem and shows why, in the absence of property rights, there is a strong tendency for fish stocks to be over-exploited and for fishing fleets to be too large. After presenting the argument in terms of several different models, each allowing a slightly different look at the problem, the economic and biological effects of various types of management techniques are discussed. . . students, researchers and practitioners will all find this second edition to be very good reading and an invaluable reference volume. *Marine Resource Economics* . an excellent piece of work, that is consistent with the high standards Dr. Anderson has established in his other efforts. J. Fisheries Research Board of Canada Lee G. Anderson earned a Ph. D. in Economics from the University of Washington in 1970. He is Professor of Economics and Marine Studies at the University of Delaware and is currently the Director of the Marine Policy Program in the College of Marine Studies. He has written or edited six books and over sixty scientific papers...
